

# JOIN US IN HONORING DR. JEFFREY FISHER

Each of the founding parents of IEA has made significant contributions to its success. Steve and Ruthann Brady helped organize our early affairs and finances before relocating to San Diego. Frank Lento found the initial space at the First Congregational Church, has hosted IEA's legendary golf outing, and has raised considerable funds from his and Diane's contacts. Diane Lento has successfully headed our Fundraising Committee and co-chaired our first Capital Campaign with Jeff Fisher. Michelle Fisher has been a tireless activist for the best practices and services for children and adults with autism. Jeff is gratified that, as a physician, he has been able to raise more than \$4 million for IEA from his loyal patients, some of whom served on the initial Board of Trustees. Although he is transitioning to the role of Trustee Emeritus, Jeff will continue to advocate for IEA. He is delighted to see the progress IEA has made over the past twenty years and is extraordinarily impressed with the dedication and skill of the current staff and Board of Trustees.

It is with great pleasure that we honor Dr. Jeffrey Fisher for his extensive service to IEA. We thank Dr. Fisher for his selfless efforts in ensuring that life-long and effective science-based intervention is available to those affected by autism. We are certain he will continue to support IEA as he moves from an active member of the Board of Trustees to a Trustee Emeritus. We will be forever grateful to Dr. Fisher for his many contributions to IEA.

Please join us in honoring Dr. Fisher on February 2, 2019. To share your special message with Dr. Fisher, and thank him for his never ending service to IEA as well as to individuals and families affected by autism, please consider participating in the journal honoring Dr. Fisher.
